WHAT IS CLAIMED IS:

- 1. A method of temporarily protecting a surface which comprises:
- a) applying a continuous coating of a masking material to said surface, which masking material comprises, before drying, an aqueous solution or emulsion consisting essentially of a film-forming, carboxylic acid-containing polymer;
- b) coating all or a portion of said surface with a coating compound, said masking material preventing said coating compound from contacting said surface; and, thereafter,
 - c) removing said masking material from said surface.
 - 2. The method of claim 1, wherein said polymer is an acrylic or methacrylic acid-containing copolymer.
- 3. The method of claim 2 wherein said acrylic or methacrylic acid containing copolymer is a water soluble copolymer.
 - 4. The method of claim 1 wherein said surface is the surface of a motor vehicle.
 - 5. The method of claim 1 wherein said masking material comprises ethylenediaminetetraaceticacid.
- 6. The method of claim 1 wherein said masking material comprises sufficient alkali to neutralize and solubilize said polymer.
 - 7. The method of claim 6 wherein the pH of said solution or emulsion is about 7.1.

35

15

20

- 8. The method of claim 1 wherein said solution or emulsion has a viscosity of between about 1400 and 1700 c.p.s.
- 9. The method of claim 1 wherein said solution or emulsion comprises from about 2 to about 10, weight percent, polymer.
- 10. The method of claim 9 wherein said solution or emulsion comprises about 5 weight percent polymer.
 - 11. A method of temporarily protecting a surface which comprises:
 - a) applying a continuous coating of a masking material to said surface, which masking material comprises, before drying, an aqueous solution or emulsion comprising, as the sole film-forming component, a carboxylic acid-containing copolymer;
 - b) coating all or a portion of said surface with a coating compound, said masking material preventing said coating compound from contacting said surface; and, thereafter,
 - c) removing said masking material from said surface.
- 12. The method of claim 11, wherein said polymer is an acrylic or methacrylic acid-containing copolymer.
- 13. The method of claim 12 wherein said acrylic or methacrylic acid-containing copolymer is a water soluble 30 copolymer.
 - 14. The method of claim 13 wherein said surface is the surface of a motor vehicle.
- 15. The method of claim 11 wherein said masking material comprises ethylenediaminetetraaceticacid.

16. The method of claim 11 wherein said masking material comprises sufficient alkali to neutralize and solubilize said polymer.

5

17. The method of claim 16 wherein the pH of said solution or emulsion is about 7.1.

18. The method of claim 11 wherein said solution or emulsion has a viscosity of between about 1400 and 1700 c.p.s.

- 19. The method of claim 11 wherein said solution or emulsion comprises from about 2 to about 10, weight percent, polymer.
 - 20. The method of claim 19 wherein said solution or emulsion comprises about 5 weight percent polymer.

20

- 21. A composition for temporarily protecting a surface which comprises an aqueous solution consisting essentially of:
- a) from about 2 to about 10, weight percent, of a film-forming acrylic or methacrylic acid copolymer.

25

- b) sufficient alkali to neutralize and solubilize said copolymer, wherein said solution has a viscosity of between about 1400 and 1700 c.p.s.
- 22. temporarily protecting A composition for 30 surface which comprises, the as sole film-forming component, an acrylic or methacrylic acid copolymer, dissolved or emulsified in an aqueous solution, wherein said solution has a viscosity of between about 1400 and 1700 c.p.s. and further comprises
- 35 ethylenediaminetetraaceticacid.

- 23. The method of claim 1 wherein said polymer is a copolymer of methacrylic acid and ethylacrylate.
- 24. The method of claim 11 wherein said polymer is a copolymer of methacrylic acid and ethylacrylate.
 - 25. The composition of claim 21 wherein said copolymer is a copolymer of methacrylic.
- 10 26. The composition of claim 22 wherein said copolymer is a copolymer of methacrylic.
